Status Bar

New

Creates a new text document. Can be activate with the accelerator key combo Ctrl+N. If there are unsaved changes JNotepad will prompt you to save them. If this is your first time saving then you will receive a save dialog to choose a location.

Open

Opens an existing text file. Can be activate with the accelerator key combo Ctrl+O. If there are unsaved changes JNotepad will prompt you to save them. If this is your first time saving then you will receive a save dialog to choose a location.

Save

Saves the current text file. Can be activate with the accelerator key combo Ctrl+S. If this is your first time saving then you will receive a save dialog to choose a location.

Save As...

Prompts the user for a file to save to and saves the text document. If the user does not include the file extension .txt will be automatically added.

I'm not going to write the whole help file.... At least right now.
